What this standard covers

This standard specifies the principles for determination of apparent porosity of carbon materials, equipment, test results, specimens, test procedure. This standard applies to the apparent porosity of carbon materials for determination. Determination of porosity, there are two, namely vacuum method and boiling method. When arbitration analysis, using a vacuum method.

Document data

International classification (ICS): 29.050.

Chinese classification (CCS): Q52.

Estimated length of the Chinese original: 6,673 words.
