What this standard covers

This standard specifies the agricultural tractors and machinery enclosed cab driver operating positions with the basic interface size power transmission couplings and 12V power grind head. The scheduled power transmission couplings used to power accessory devices convenient type of non- environmentally sealed power for the driver to provide a way to get the power down without changing the tractor/machine power harness layout conditions. This standard specifies the maximum power transmission couplings current capacity of 30A.

Document data

International classification (ICS): 65.060.01.

Chinese classification (CCS): B90.

Estimated length of the Chinese original: 9,943 words.

Adopted international standard: ISO 17612-2004, IDT.
