- e) Geographic features have been changed (see 6.1, 6.1.1 in the.2009 edition);
- f) Soil quality requirements have been changed (see 6.3, 6.1.3 of the.2009 edition);

- g) Added requirements for tea tree varieties (see 7.1);
- h) The transplanting time and requirements for asexual reproduction have been changed (see 7.2.1.2, 6.2.1.2 in the 2009 version);
- i) The planting density has been changed, and specific requirements for planting methods have been added (see 7.2.2,

1 Scope

GB/T 24710-2026 is the Chinese national standard covering Panyong Congou - the Fujian black tea that was exported through Fuzhou in the nineteenth century, with its defined area, its cultivars, the withering, rolling, fermenting and drying, and the grades with their sensory descriptions. It replaces GB/T 24710-2009. It was issued on 28 January 2026 and has been in force since 1 August 2026, replacing GB/T 24710-2009. This page is published from the official record of the 2026 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document defines the terminology for the geographical indication product Tanyang Gongfu, and specifies the geographical area, classification, grading, physical standard samples, and technical requirements. Requirements for inspection, marking, labeling, packaging, transportation, storage and shelf life are described, along with the requirements for the place of origin and the corresponding inspection methods. This document applies to the production, processing, distribution, and inspection of the geographical indication product Tanyang Gongfu, and also applies to the geographical indication product Tanyang Gongfu. Protection and management.
