What this standard covers

This standard specifies a reference material injected is determined by the ion secondary ion mass spectrometry relative sensitivity factor approach. This standard applies to the chemical composition of the substrate single sample, which injected substance peak atomic concentration does not exceed 1%.

Document data

International classification (ICS): 71.040.40.

Chinese classification (CCS): G04.

Estimated length of the Chinese original: 7,759 words.

Adopted international standard: ISO 18114-2003, IDT.
