Foreword

This standard is proposed and managed by China National Institute of Standardization.

This standard drafting units. China National Institute of Standardization, China University of Mining (Beijing), China Textile Academy, China Building Materials Inspection Inspection and Certification Center, China Electronics Standardization Institute, Mechanical Engineering Research Institute General Hospital.

Introduction

Reason consumer goods cause injury can generally be divided into three categories, namely people, the environment and consumer itself. Through long-term, a large number of investigations have the following conclusions.

- Most consumers can not significantly change habits in the short term to adapt to the requirements of certain consumer goods;
- Most consumers can not quickly improve the home environment to accommodate certain consumer requirements;
- Improving the rational use of the limited consumer knowledge of consumer goods, to solve the problem of the role of consumer product safety through education and training and other means.

Therefore, solving the consumer product safety issues need to give full play to the initiative of the manufacturer. Compared with other organizations, manufacturers more capable in the set Design, manufacture of consumer goods consider human and environmental factors in the case and with less effort and cost, significantly improve the safety of consumer products.

This standard can be used alone, or as a supplement to the manufacturer's quality management system, prompting the formation of a more perfect system of consumer product safety Building management system, to produce safer consumer products.

Consumer Product Safety Manufacturing Management Guide

1 Scope

The criteria to determine the factors involved in the process of manufacturing of consumer goods product safety, control of these factors are given guidelines.
