Foreword

Appendix A of this standard is a normative appendix, Appendix B is an informative annex. This standard is proposed and managed by China National Institute of Standardization. This standard is mainly drafted by: China National Institute of Standardization. The main drafters of this standard. Wang Zhiqiang, Yang Qinghai, Hong Yan, Li Wenwu, Liu Shouhua, Zou Yali. This standard was first formulated.

The development of standards intended to face the construction machinery industry application service provider (ASP) and its evaluation work and services to provide technical means Guide, in order to achieve a fair, impartial, scientific and objective evaluation, selection and application software development play a guiding role in promoting domestic independent copyright software Continuous improvement of product quality, we recommend the application of advanced software applications for the majority of business users. This standard can be used as construction machinery enterprises Technical Guidelines for the user to select suppliers when ASP. Manufacturing Enterprise ASP Services Specification Reviews

1 Scope

GB/T 25508-2010 is the Chinese national standard on evaluating specification for asp service of manufacturing enterprise, in the field of information technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding

as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 1 December 2010 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 May 2011. Classification: ICS 35.240.50, CCS L67. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the basic model for ASP suppliers and their service for evaluation, the evaluation indicators and evaluation process. This standard applies to manufacturers, independent software testing organizations, software developers and other products of ASP and the services provided for evaluation.

2 Normative references

The following documents contain provisions which, through reference in this standard and become the standard terms. For dated references, subsequent Amendments (not including errata content) or revisions do not apply to this standard, however, encourage the parties to the agreement are based on research Whether the latest versions of these documents. For undated reference documents, the latest versions apply to this standard.

GB/T 15532-2008 computer software test specification

GB/T 17544-1998 Information technology - Software packages - Quality requirements and testing General requirements

GB/T 27025-2008 testing and calibration laboratories

3 Terms, definitions and abbreviations
