What this standard covers

This standard specifies the cutter (for example, in line with GB/T 21019 cutter) used in high-speed metal cutting machine for cutting (cutting at high peripheral speed) generated when the fundamental danger. Specifies the safety requirements. This standard specifies the design methods, centrifugal force of the testing procedures, operating limits and the information provided to minimize the danger or completely eliminated. This standard applies to in Figure 1, speed milling operation shown in Figure 2.

Document data

International classification (ICS): 25.100.20.

Chinese classification (CCS): J41.

Estimated length of the Chinese original: 14,165 words.

Adopted international standard: ISO 15641-2001, IDT.
