What this standard covers

This standard specifies the technical wrought superalloy bar products delivery requirements, test methods, inspection rules, packaging, marking and quality certification, ordering content. This standard applies to a diameter greater than 8mm high-temperature alloy bar products (hereinafter referred to as the bar), including: general load-bearing parts with a diameter of 20mm ~ 450mm hot rolled and forged bars (hereinafter referred to as load-bearing parts with ordinary bar), fasteners cold-drawn bars, temperature turbine blades and turbine rotation bearing bolts and other parts with hot-rolled bars. Other types of reference bar can be used.

Document data

International classification (ICS): 77.140.99.

Chinese classification (CCS): H57.

Estimated length of the Chinese original: 14,196 words.
