What this standard covers

This standard specifies the technical requirements for nitrogen fluoride and fluorine gas mixture, test methods and packaging, signs, storage and safety requirements. This standard applies to the electrolysis of anhydrous hydrogen fluoride and fluoride treatment process after purification obtained. Fluoride used in the preparation of uranium hexafluoride, sulfur hexafluoride, boron trifluoride, two silver fluoride, cobalt trifluoride trifluoride and magnesium fluoride, can also be used in the field of laser gas or fluorinated plastics processing. Fluorine pressure nitrogen gas mixture was prepared using the method. Mixed gas is mainly used for automobile, fluorinated materials in the pharmaceutical industry.

Document data

International classification (ICS): 71.100.20.

Chinese classification (CCS): G86.

Estimated length of the Chinese original: 10,151 words.
