The main drafters of this standard. Chan Kwok-keung, in the army, Early Development, Hu Hao, Fang Guoping, Guo Chang Yang, Ge Dongying, Gechuan Bing. Knitted Cotton Clothing

### 1 Scope

GB/T 26384-2011 is the Chinese national standard on knitted wadded garments, in the field of textile and leather technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 12 May 2011 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 15 September 2011. Classification: ICS 59.080.30, CCS W63. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the number of knitted cotton clothing type, requirements, test methods, determination rules, labeling, packaging, transportation and storage. This

standard applies to identify the quality of the knitted fabric as the main fabric, in a variety of textile fibers as filler made of cotton apparel products.
