Foreword

This section drafted in accordance with GB/T 1.1-2009 given rules.

This section identical with IEC 61355-1:2008 "complete sets of equipment, systems and device files of Classification and designation - Part 1. Rules and Classification "(in English).

This part of IEC 61355-1:2008 "complete sets of equipment, systems and device files of Classification and designation - Part 1. Rules and classification" Modified editorial.

This part of the National Electrical information structures, documentation and graphical symbols Standardization Technical Committee (SAC/TC27) and focal points.

This section is responsible for drafting units. the machine Productivity Promotion Center, China Aerospace Science and Industry Corporation II Institute twenty-three, China Building Standard Associate Design and Research Institute of China Aviation Technology Institute.

1 Scope

This section provides information based on the specific content of the document classification and document type level rules and guidelines for the preparation of the code.

This section applies to all documents in the life of the art equipment, systems and equipment used.

Note: The definition and classification code as the value to be used together with the metadata in the file management system.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

GB/T 4880.1-2005 Language Name Code Part 1. 2-letter code (ISO 639-1:2002, MOD)
GB/T 6988.1-2008 Preparation of documents used in electrical technology - Part 1. Rules (IEC 61082-1:2006, IDT) GB/T 19529-2004 constitute technical information and documents (IEC 62023:2000, IDT) ISO 3166:2006 world countries and regions name Code ISO 7200:2004 Technical product documentation title bar and file header data area (Technicalproductdocumentation-Datafieldsintitleblocksanddocumentheaders)

3 Terms and Definitions

The following terms and definitions apply to this document.

Data media datamedium Capable of data recording media and read.

File document

Between the user and group management system and exchange, identify and structured for mutual exchange of a certain amount of information.

Note 1: The "File" is not limited to its meaning in the legal sense.

Note 2: The file can be used with the type of information and forms of expression provisions of the same, as a schematic diagram, wiring table, the menu map.

Compound file compositedocument File contains information about different parts, each part involving different types of file-level.

File set documentset A collection of various types of files, Visual do a whole.

Note: The file can be set files and complex files.
