Foreword

This standard is identical with ISO/IEC Guide 23. 1982, "third-party certification system standards compliance representation." ISO/IEC Guide 23.1982 is the International Organization for Standardization (ISO) Certification Committee (CERTICO) draft standard. Certification Board (CERTICO) in 1985 it was renamed the Committee on Conformity Assessment (CASCO).

For ease of use, the standards were appropriate editorial changes.

--- After the introduction to the standard advance preface, before;

Title --- Chapter 1 from "The scope and field" with "" and the title of the second chapter from "references" to "normative cited with the file "heading in Chapter 3 of the" definition "to" Terms and Definitions ";

--- Increase Normative references of "key words";

--- Deletion of two related ISO/IEC described in Chapter 1 "ISO/IEC Guide 23 is mainly used for international standards, but can also be used National standards or other purposes. "And Chapter 8," a provision indicating compliance (mark of conformity and certificate of conformity) To International standards demand due to country, legal or other reasons, may not be using all of ISO or IEC members. " this standard certification and accreditation by the National Standardization Technical Committee (SAC/TC261) and focal points.

This standard was drafted. China Quality Certification Center, the National Certification and Accreditation Regulatory Commission, China National Accreditation committee Council

CQM Group, Shenzhen Electronic Product Quality Testing Center, Guangzhou Daily electrical detection by the Shanghai Quality Supervision, Inspection Technology Research Study hospital.

Introduction

With the continuous development of international trade and government agencies, buyers, consumers and other parties to determine the product or service meets standards Increasing demand, showing a clear understanding of this method of compliance is becoming increasingly important.

When considering this requirement, we put forward the following questions.

--- What objects are certified?

--- Who for certification?

--- Who needs certification?

--- Why do you need to prove compliance?

--- How to best meet the information will be passed to the buyer, user (consumer) or government agencies?
