Foreword

This standard was drafted in accordance with GB/T 1.1-2009 given rules.

This standard replaces GB/T 27024-2004 "Conformity Assessment personnel certification bodies General requirements", and GB/T 27024-2004 phase Ratio, the main technical changes are as follows.

- Legacy standards need to clarify the disputed part of the contents have been revised;
- Absorbed integrated guidelines internationally recognized organizations (IAF) guidance documents given;
- Added some provisions requirements;
- Application of ISO/CASCO standard template to adjust the standard structure to make it more coordination with other conformity assessment criteria.

This standard uses the translation method identical with ISO/IEC 17024:2012 "Conformity Assessment personnel certification bodies General requirements" Correspondence between the consistency of the standards of international documents and normative references of the following documents.

- GB/T 27000-2006 Conformity assessment - Vocabulary and general principles (ISO/IEC 17000-2004, IDT) this standard certification and accreditation by the National Standardization Technical Committee (SAC/TC261) and focal points.

This standard was drafted. China Certification and Accreditation Association, China National Accreditation Center, China Quality Certification Center for Quality Mark recognition Syndrome Group Ltd., Guangzhou Saibao Certification Center Services Limited, the Great Wall (Tianjin) Quality Assurance Center, Beijing Huayuan Certification Center, Technical inspection Watson Ltd., China Association for Quality Assurance Center, China Classification Society quality certification company.

Introduction

This standard is intended to establish and promote a globally recognized benchmark for personnel certification body. Personnel Certification is a guarantee provided the method, which shows that certified personnel to meet the requirements of the certification scheme. The ability of certified personnel for review and periodic re-evaluation, this process has been global recognition and allows the officer authentication trusted.

However, it is necessary to distinguish between these two different situations, in some cases, personnel certification scheme is appropriate, but in other cases it His staff qualification method is more appropriate. Due to continuous innovation and increasingly specialized staff technology enables developers certification scheme We can compensate for the lack of education and training, so as to promote development of the global job market. However, for those public services, the government is running Related jobs, is different from the other methods of authentication it is still necessary.

Compared with other types of conformity assessment bodies (such as management system certification bodies), a typical functions of personnel certification agencies to implement test Nuclear, which uses objective criteria for staff evaluation and scoring ability. Under normal circumstances, the full planning personnel certification bodies and organizations Assessment, to ensure the impartiality of the operation and reduce the risk of conflict of interest, this standard is given further demands.

This standard as a basis for personnel certification bodies and personnel certification programs recognized can promote them within the scope of national and international the generally accepted. Only the development and maintenance of various personnel certification program system is coordinated in order to form mutual recognition and the global exchange of personnel environment of.

This standard specifies requirements for certification bodies to ensure that the personnel in a coordinated, comparable and reliable way to operate. The standard Registration requirements are general requirements for personnel certification bodies. Certified personnel should be established to implement the authentication scheme. Personnel Certification Scheme should be fully package Including requirements of this standard, required or expected market demand or government requirements.

This standard can be used as accreditation, peer review, the government (or program owner and other organizations) recognized normative documents.

Appendix A of this standard describes the certification body and certification activities on the principle that, as one of the main principles of unforeseen circumstances make a decision

Policy guidelines.
