Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

GB/T 27534 "Technical Specifications for Investigation of Livestock and Poultry Genetic Resources" and GB/T 45550 "Technical Specifications for Investigation of Bee Genetic Resources", GB/T 45552 "Technical Specifications for Investigation of Silkworm Genetic Resources" and GB/T 45553 "Technical Specifications for Investigation of Tussah Genetic Resources" jointly form the support The basis for the investigation of genetic resources of livestock, poultry, bees and silkworms.

This document is Part 8 of GB/T 27534 Technical Specifications for Livestock and Poultry Genetic Resources Survey. GB/T 27534 has been published as follows part.

- Part 1: General;
- Part 2: Pigs;
- Part 3: Cattle;
- Part 4: Sheep;
- Part 5: Goats;

- Part 6: Horses and donkeys;
- Part 7: Camels and alpacas;
- Part 8: Rabbit;
- Part 9: Poultry;
- Part 10. Deer;
- Part 11. Mink, fox and raccoon dog.

This document replaces GB/T 27534.8-2011 "Technical Specifications for Survey of Livestock and Poultry Genetic Resources Part 8: Rabbits" and is consistent with GB/T 27534.8-2011, in addition to structural adjustments and editorial changes, the main technical changes are as follows.

- a) The overview of genetic resources has been changed (see 6.1, 4.1 of the 2011 edition);
- b) The body size and weight of adult rabbits were changed (see 6.3.1, 4.3.1 of the 2011 edition);
- c) The meat production performance test indicators have been changed (see 6.3.2, 4.3.2 of the 2011 edition);
- d) The wool production performance, wool quality and hide production performance measurement indicators have been changed (see 6.3.3, 6.3.4, 6.3.5, 4.3.3 of the 2011 edition);
- e) The reproductive performance test indicators have been changed (see 6.3.6, 4.3.4 of the 2011 edition);
- f) Added survey methods (see Chapter 7);
- g) The number of adult female rabbits in the body shape and appearance survey has been changed (see 7.2.1, 4.2.1 of the 2011 edition);
- h) Increased the number of surveys on body shape, body size and weight, meat production performance, wool production performance, wool quality, skin production performance, and reproductive performance (see 7.2.1, 7.3.1, 7.4.1, 7.5.1, 7.6.1, 7.7.1, 7.8.1);
- i) Deleted the species photos (see Chapter 5 of the 2011 edition);
- j) Records and archives management has been modified (see Chapter 8, Chapter 6 of the 2011 edition);
- k) The rabbit genetic resources survey form (see Appendix A, 2011 Edition) has been modified.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the Ministry of Agriculture and Rural Affairs of the People's Republic of China.

This document is under the jurisdiction of the National Technical Committee on Animal Husbandry Standardization (SAC/TC274).

This document was drafted by: National Animal Husbandry Station, Yangzhou University, Jiangsu Animal Husbandry Station, Fujian Animal Husbandry Station, Sichuan Animal Husbandry Station, Institute of Animal Husbandry Quality and Standards of Xinjiang Academy of Animal Husbandry Sciences (Xinjiang Uygur Autonomous Region Breeding Sheep and Wool and Cashmere Quality and Safety Supervision and Inspection Center).

The main drafters of this document are: Tian Shuangxi, Wu Xinsheng, Xue Ming, Zhong Liwei, Han Xu, Zhao Bohao, Lai Ningjie, Chen Yang, Pan Yulai, Ren Boyang, Ge Guihua.

The previous versions of this document and the documents it replaces are as follows.

- First published in 2011 as GB/T 27534.8-2011;
- This is the first revision.

Introduction

Livestock and poultry genetic resources are important strategic resources for maintaining national ecological security and agricultural security, and are the material basis for the high-quality development of animal husbandry.

Conducting livestock and poultry genetic resource surveys is a statutory duty stipulated in the Animal Husbandry Law of the People's Republic of China and is an important task in approving new livestock and poultry breeds (supporting lines) and identifying The basic requirements for identifying new genetic resources, formulating livestock and poultry genetic resource protection and utilization plans and livestock and poultry genetic resource protection lists, and engaging in breeding livestock and poultry production and management, etc.

GB/T 27534 "Technical Specifications for Livestock and Poultry Genetic Resources Survey" aims to standardize and guide the investigation of livestock and poultry genetic resources. It consists of eleven parts.

- Part 1: General Principles. The purpose is to provide general survey rules for livestock and poultry genetic resources surveys.
- Part 2: Pig. The purpose is to standardize the survey content and methods of pig genetic resources.
- Part 3: Cattle. The purpose is to standardize the survey content and methods of cattle genetic resources.

- Part 4: Sheep. The purpose is to standardize the survey content and methods of sheep genetic resources.
- Part 5: Goats. The purpose is to standardize the survey content and methods of goat genetic resources.
- Part 6: Horses and donkeys. The purpose is to standardize the survey content and methods of horse and donkey genetic resources.
- Part 7: Camels and alpacas. The purpose is to standardize the survey content and methods of camel and alpaca genetic resources.
- Part 8: Rabbit. The purpose is to standardize the survey content and methods of rabbit genetic resources.
- Part 9: Poultry. The purpose is to standardize the survey content and methods of poultry genetic resources.
- Part 10: Deer. The purpose is to standardize the survey content and methods of deer genetic resources.
- Part 11: Mink, fox and raccoon dog. The purpose is to standardize the survey content and methods of mink, fox and raccoon dog genetic resources.

Technical Specifications for Livestock and Poultry Genetic Resources Survey Part 8: Rabbit

1 Scope

This document specifies the objects, methods, contents, and record and archive management requirements of rabbit genetic resources survey, and describes the survey methods.

This document is applicable to rabbit genetic resources survey.

2 Normative references

GB/T 27534.1

3 Terms and definitions

There are no terms or definitions that require definition in this document.

4 Survey subjects

This shall be carried out in accordance with the provisions of GB/T 27534.1.

5 Survey Methods
