What this standard covers

This standard specifies the non-rigid thermoplastic sheet or film to withstand high temperature conditions specified treatment method for measuring linear dimensions change. This standard applies to optical functional PET film and PET film as a function of the optical functional film substrate dimensional changes after heat test.

Document data

International classification (ICS): 71.080.99.

Chinese classification (CCS): G15.

Estimated length of the Chinese original: 6,659 words.
