

ICS 37.020
CCS N 30

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 27667-2011

**Quality evaluation of optical systems -- Determination of
distortion**

光学系统像质评价 畸变的测定

(English Translation)

Issued on: December 30, 2011

Implemented on: May 1, 2012

Issued by: Standardization Administration of China

What this standard covers

This standard specifies the optical system radial distortion measurement method. This standard applies to spectrum within the range of 100nm ~ 15000nm, and has a rotational symmetry properties of optical systems. Characteristics that meet the rotationally symmetric electron optical imaging systems can also refer to the use. This standard does not apply to deformation of the optical system.

Document data

International classification (ICS): 37.020.

Chinese classification (CCS): N30.

Estimated length of the Chinese original: 19,172 words.

Adopted international standard: ISO 9039-2008, IDT.
