### What this standard covers

This standard specifies the quality of thermal gravimetric analyzer calibration test methods indicated value. This standard applies to the TGA mass/weight calibration or performance verification, and applies to commercial and custom equipment. This standard does not include all of the safety associated with its use issues. Before using this standard method, the user has the responsibility to establish appropriate safety and health practices and to confirm the applicability of norms.

### Document data

International classification (ICS): 19.020.

Chinese classification (CCS): N04.

Estimated length of the Chinese original: 13,166 words.

### Standards quoted by this document

GB/T 6425; ASTM E473; ASTM E691; ASEM E1142
