Foreword

GB/T 27865-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 September 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 April 2027.

This edition replaces GB/T 27865-2011.

The document adopts an international standard (ISO or IEC).

It is under the responsibility of the Standardization Administration of China.

Classification: ICS 13.300; CCS A80.

1 Scope

This standard gives guidelines for applying GB/T 19001, the quality management system standard, to the manufacture of packagings, intermediate bulk containers, and large packagings used for dangerous goods. Because such packagings are important for safe transport, producers need a quality system that suits their products.

Manufacturers and reconditioners of dangerous goods packaging, certification and testing bodies, quality managers, and chemical companies that buy certified packaging are the likely users. It is a recommended national standard (GB/T), so it is voluntary unless a contract or authority requires it. The standard adopts an international standard.

This edition replaces GB/T 27865-2011, and quality documents that cite the earlier version may need updating. It is a guidance document tied to quality management rather than a packaging design specification. It takes effect on 1 April 2027.
