What this standard covers

This standard specifies the following types of sliding bearings geometrical and material quality characteristics of quality control techniques and inspection: Conforms to ISO 3548 as specified in the metal thin-walled flanged and flangeless bearing, manufacture and require half the total thickness of the swap diameter ratio of S3: Do> O. 11 of flanged and flangeless metal thick bush, meet ISO 3547 series of standards set forth Wrapped bushes, by a single layer or multi-layer material, the outer diameter Do not greater than 230 mm of flanged and flangeless solid metal bushings, D1 ?? 200 mm in diameter flanged and flangeless overall thermoplastic sleeve, comply with ISO 6525 and ISO 6526 as specified in the whole circle and half thrust washers, comply with ISO 2795 sintered bushings.

Document data

International classification (ICS): 21.100.10.

Chinese classification (CCS): J12.

Estimated length of the Chinese original: 41,450 words.

Adopted international standard: ISO 12301-2007, IDT.
