Foreword

GB/T 28048-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 September 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 April 2027.

This edition replaces GB/T 28048-2011.

It is under the responsibility of the Ministry of Industry and Information Technology (Electronics).

Classification: ICS 33.160.99; CCS M72.

1 Scope

Sound reinforcement systems in auditoriums, gymnasiums and stadiums are the focus of this acceptance specification. It concerns how such an installation is checked after it is built, so that owners and operators can decide whether it is ready to hand over. Acoustic consultants, audio system integrators, venue owners, commissioning engineers, contractors and supervision bodies are the people who would use it on a project.

The document is a recommended national standard, issued on 28 September 2026 and effective from 1 April 2027. It replaces GB/T 28048-2011, so projects that reach acceptance after the effective date should consider the new edition when writing contract terms.

Compliance is voluntary unless the contract or a local authority makes it binding.

International contractors installing audio systems in Chinese sports and performance venues, and owners who need a recognized basis for acceptance, will find it a practical point of reference.
