Standardization Administration**

## Table of Contents

|                                                |
|------------------------------------------------|
| 1 Scope                                        |
| 2 Normative references                         |
| 3 Terms and definitions                        |
| 4 Concept                                      |
| 4.1 Introduction                               |
| 4.2 Summary                                    |
| 4.3 Binding and protocol dependencies          |
| 4.4 Interface construction                     |
| 4.5 Event                                      |
| 4.6 Identifier                                 |
| 4.7 Related URLs                               |
| 4.8 Execution Model                            |
| 5 Data type reference                          |
| 5.1 Introduction and topics                    |
| 5.2 Data type definition                       |
| 5.3 Error types                                |
| 5.4 Event types                                |
| 6 Service Reference                            |
| 6.1 Introduction and topics                    |
| 6.2 Create connection                          |
| 6.3 Browser Service                            |
| 6.4 Execution Context Service                  |
| 6.5 Scene Service                              |
| 6.6 Node Service                               |
| 6.7 Domain Services                            |
| 6.8 Routing Service                            |
| 6.9 Proto Type Service                         |
| 6.10 Configuration Service                     |
| 6.11 Services provided by script content       |
| 6.12 Matrix Service                            |
| 7 Consistency and minimum support requirements |
| 7.1 Introduction and topics                    |

- 7.2 Consistency
- 7.3 Minimum requirements
- 1 Scope
- 2 Normative references
- 4.2.2 Compatibility with ISO /IEC 14772
- 4.3 Binding and protocol dependencies
- 4.4 Interface construction
  - 4.4.1 Overview
  - 4.4.2 User code
  - 4.4.3 Include nodes
  - 4.4.4 Application
  - 4.4.5 Session
  - 4.4.6 Browser
  - 4.4.7 Scene
  - 4.4.8 Nodes and node life cycle
- 4.5 Event
  - 4.5.1 Concept
  - 4.5.2 Inside the browser
  - 4.5.3 Browser to external application
    - 4.5.3.1 Overview
    - 4.5.3.2 Initialization
    - 4.5.3.3 Close
    - 4.5.3.4 No URL available
    - 4.5.3.5 Connection interrupted
- 4.6 Identifier
- 4.7 Related URLs
- 4.8 Execution model
  - 4.8.1 Summary of interaction types
  - 4.8.2 Event model evaluation sequence
  - 4.8.3 Internal interaction
    - 4.8.3.1 Allow interaction
