What this standard covers

This standard specifies an anionic detergent active materials can be hydrolyzed under acidic conditions and non hydrolysis testing methods. This standard applies to active species are alkyl sulfates, alkyl phenol ether sulfates and fatty alcohol ether sulfates. If the active substance content of mass fraction, the two types of surface active agent has an average molecular weight must be known or determined in advance. If a detergent containing oxidizer, you must destroy before hydrolysis.

Document data

International classification (ICS): 71.100.40.

Chinese classification (CCS): G72.

Estimated length of the Chinese original: 9,950 words.

Adopted international standard: ISO 2870-2009, MOD.
