What this standard covers

This standard specifies test methods for measuring glass annealing point and strain point by bending beam method. This standard applies to all production of glass, glass devitrification phenomenon can not occur in the sample preparation and testing process.

Document data

International classification (ICS): 81.040.01.

Chinese classification (CCS): N64.

Estimated length of the Chinese original: 10,150 words.

Adopted international standard: ISO 7884-7-1987, MOD.
