What this standard covers

This standard specifies the communications equipment, including ships and offshore cables and cable filling compounds for test methods. This section provides for filling paste Determination of dropping point, oil separation and determination, low temperature brittleness test, total acid number determination, corrosion test, 23°C dielectric constant measurement, 23°C and 100°C, the DC resistance test method for determination of other.

Document data

International classification (ICS): 29.060.

Chinese classification (CCS): K13.

Estimated length of the Chinese original: 14,147 words.

Adopted international standard: IEC 60811-5-1-1990, IDT.

Supersedes the earlier edition GB/T 2951.10-1997.
