---First published in 2013 as GB/T 30444-2013;

---This is the first revision. Classification of healthcare services

1 Scope

GB/T 30444-2026 is the Chinese national standard covering the classification of health care services - the categories and their boundaries, which is what statistics, licensing and supervision of a large and loosely regulated sector all depend on. It replaces GB/T 30444-2013. It was issued on 28 January 2026 and has been in force since 1 August 2026, replacing GB/T 30444-2013. The document is under the responsibility of the National Administration of Traditional Chinese Medicine. This page is published from the official record of the 2026 edition; the clause text of a standard this recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document defines the relevant terminology for the health care service industry and provides a classification of the health care service industry. This document applies to the classification of the health care service industry.
