China Certification Center.

Introduction

Events often have a high degree of concern because of their properties and temporary and positive and negative impact on the social, economic and environmental.

The standards are designed to help organizations and individuals to improve the sustainability of their events and related activities.

In order to improve the sustainability of large-scale events, this standard specifies requirements for sustainable events management system. This standard applies to all types and sizes of organizations in the design and conduct of large-scale activities, as well as different geographical, cultural and social environment. Meanwhile, the standard to Seeking organizations recognize that the relationship between events and society, the impact of large-scale activities on society and society's expectations of large-scale events.

Management system standard is not a checklist or a reporting framework, nor a method of evaluating the performance of large-scale activities sustainability approach. it it requires organizations to improve processes and thinking to continually improve performance, and to give organizations flexibility, without departing from the events target the prerequisite to innovation to carry out large-scale events and activities related manner.

Organizations can flexibly apply this standard. For yet officially emphasis on sustainable development of the organization, it can be a starting point for the application of this standard to establish A large-scale event sustainability management system. For existing management system of organizations, the requirements of this standard can be integrated into the existing system of in. Over time, all organizations can benefit from continuous improvement process.

The complexity of the document the extent and the resources invested in the system, depending on the scope and size of the organization are determined by the system, and the organization Activities, the nature of products and services. SMEs in particular.

The success of the system depends on all management levels and functions, especially the commitment of top management. Furthermore, in order to be successful, the management body Department must maintain flexibility and integration of large-scale event management process, and not just be seen as a new component. In order to maximize the Effectiveness, the system need to be extended to the entire supply chain and stakeholders determined.
