What this standard covers

This standard specifies test methods for the determination of the total thickness of the conveyor belt and the thickness of the layers. Each layer includes a cover layer, a core layer, a sandwich layer, i.e., a substance located between adjacent layers. This standard applies to textile core conveyor belts. This standard does not apply to light conveyor belts specified in ISO 21183-1.

Document data

International classification (ICS): 53.040.20.

Chinese classification (CCS): G42.

Estimated length of the Chinese original: 12,198 words.

Adopted international standard: ISO 583-2007, IDT.
