Foreword

GB/T 32632-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 August 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 March 2027.

This edition replaces GB/T 32632.2-2016.

It is under the responsibility of the Ministry of Industry and Information Technology (Communications).

Classification: ICS 33.050.10; CCS M40.

1 Scope

This standard gives accessibility design guidelines for information and communication technology terminal equipment. Its purpose is to help products such as phones, tablets and other terminals work for people with different abilities, including older users and users with disabilities. It is written for product designers, hardware and software developers, accessibility specialists and manufacturers that sell terminal equipment in China.

The edition was issued on 28 August 2026 and takes effect on 1 March 2027. It replaces GB/T 32632.2-2016. As a GB/T document it is recommended, and the word guidelines in the title indicates that it sets out design principles for developers to apply. Companies preparing products for the Chinese market, and procurement teams that wish to ask suppliers for accessible design, can use it as a reference point. Teams that worked from the earlier edition should confirm which edition their product documentation cites before the new one takes effect.
