Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

This document is the second part of GB/T 32636 "General coded character set for information technology (Basic multilingual plane) Chinese character 28-dot matrix font" Part. GB/T 32636 has published the following parts.

- Part 1: Songti;
- Part 2: boldface.

This document replaces GB/T 32636.2-2016 "Information technology general multi-octet

coded character set (Basic Multilingual Plane) Chinese characters Compared with GB/T 32636.2-2016, in addition to structural adjustments and editorial changes, the main technical The changes are as follows.

- a) The glyphs of some Chinese characters have been changed (see 7.3, 7.3 of the 2016 edition);
- b) Added 28-dot boldface fonts for 74 Chinese characters in the code segments 0x9FA6 to 0x9FEF of the Basic Multilingual Plane (see 7.3);
- c) Added 12 CJK compatible Chinese characters in the Basic Multilingual Plane (located at FA0E, FA0F, FA11, FA13, FA14, FA1F, 28-dot boldface font for FA21, FA23, FA24, FA27, FA28, FA29 code positions) (see 7.3);
- d) Added 14 additional CJK radicals to the Basic Multilingual Plane (located at 2E81, 2E84, 2E88, 2E8B, 2E8C, 2E97, 28-dot boldface font for the code positions 2EA7, 2EAA, 2EAE, 2EB3, 2EB6, 2EB7, 2EBB, 2ECA (see 7.3);
- e) Added 28-dot boldface glyphs for 196 Chinese characters in the "General Standard Chinese Character Table" outside the Basic Multilingual Plane (see 7.3).

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed and coordinated by the National Technical Committee for Information Technology Standardization (SAC/TC28).

This document was drafted by: China Electronics Technology Standardization Institute, Weifang Beida Jade Bird Huaguang Phototypesetting Co., Ltd., Rocket Force Equipment Research The Fourth Research Institute of the Institute.

The main drafters of this document are: Huang Shanshan, Cao Ying, Cui Xiaolin, Dai Hong, Lü Jianchun and Zhou Jiping.

The previous versions of this document and the documents it replaces are as follows.

- First published in 2016 as GB/T 32636.2-2016;
- This is the first revision.

Introduction

GB/T 32636 "Information technology general coded character set (Basic multilingual plane) Chinese character 28-dot matrix font" is based on GB/T CJK unified Chinese characters, CJK unified Chinese characters expansion A, CJK compatible Chinese characters (including only those in GB 18030-

2022), supplementary CJK radicals (including only the radicals of Chinese characters included in GB 18030-2022) and the General Standard Chinese Characters The Chinese

graphic characters provided by the remaining Chinese characters in the "Table" are based on the standard glyphs given in the "General Standard Chinese Character Table" and are in accordance with the current standard Based on the principle of Chinese character font organization, a 28-dot Chinese character font was specifically designed for information systems.

GB/T 32636 aims to solve the problem of Chinese character information display in Chinese information processing systems and improve the use of Chinese character font products for information technology.

The accuracy and standardization of Chinese characters are to be improved to meet the development of Chinese information processing and the needs of international information exchange and the standardization of Chinese characters. It consists of two parts.

- Part 1: Song-style font. The purpose is to specify the 28-dot Song-style font for Chinese characters used in information systems.
- Part 2: Bold. The purpose is to specify the 28-dot bold font of Chinese characters for information systems.

Information technology universal coded character set (Basic Multilingual Plane) Chinese 28-dot font part 2.bold

1 Scope

This document specifies the CJK unified Chinese characters and their extension A, CJK compatible Chinese characters in GB/T 13000-2025 Basic Multilingual Plane (Contains only compatible Chinese characters included in GB 18030-2022), supplements CJK radicals (contains only compatible Chinese characters included in GB 18030-2022 Radicals) and 28-dot boldface fonts of 196 Chinese characters outside the basic multilingual plane in the "General Standard Chinese Character Table".

This document is applicable to the design of Chinese character dot matrix fonts in various electronic information products and digital products, and is also applicable to other related equipment.

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 Glyph

A recognizable abstract graphic symbol not dependent on any particular design.

3.2 Font

A collection of glyphs with the same basic design.

3.3 dotmatrixfont

The shape of a graphic character is represented by a collection of points.

3.4 character order

The order in which graphic characters are arranged in a set according to certain rules.

4 Font and order

This document is based on the "General Standard Chinese Character Table" and is designed according to the principles of current standard Chinese character shape organization.

This document is based on GB/T 13000-2025 Basic Multilingual Plane CJK Unified Chinese Characters, CJK Unified Chinese Character Extension A, CJK Compatible Chinese characters (including only compatible Chinese characters included in GB 18030-2022), supplementary CJK radicals (including only compatible Chinese characters included in GB 18030-2022
