What this standard covers

This standard specifies the method for measuring the performance of the same stripped asphalt roofing membrane indirect seam. This test method is to test mechanically fixed single bitumen membrane seams performance. Characteristics of bitumen-based membrane stripping lap width varies between materials, overlap method (flame or heat welding, thermal bonding or asphalt, cold adhesive, etc.), lap dimensions, different operating processes of change.

Document data

International classification (ICS): 91.120.30.

Chinese classification (CCS): Q17.

Estimated length of the Chinese original: 7,786 words.
