What this standard covers

This standard specifies the asphalt roofing membrane thickness, Determination of mass per unit area. Bitumen membrane thickness for most measurements, including mineral material membrane. Measuring the thickness of the surface obviously does not apply to construction or a rugged fiber backing membrane. For these products, instead of using the mass per unit area thickness. Determination of mass per unit area is suitable for inspection, express values ??declared by the manufacturer, not for perforated materials.

Document data

International classification (ICS): 91.120.30.

Chinese classification (CCS): Q17.

Estimated length of the Chinese original: 7,780 words.
