What this standard covers

This standard specifies the order content, size, shape, weight and permissible deviation, technical requirements, test methods, inspection rules, packaging, marking and quality certificates of stainless steel composite pipes for fluid transportation. This standard is applicable to inner-lining or lining composite steel pipe (hereinafter referred to as composite steel pipe) in which a stainless steel is a complex layer, a carbon steel or a low-alloy steel is used as a base layer for general fluid and chemical weak corrosion environment fluid transportation.

Document data

International classification (ICS): 77.140.75.

Chinese classification (CCS): H48.

Estimated length of the Chinese original: 22,289 words.
