- 5 Side cabinet drawer width 7 T Table top depth 8 T

## Foreword

This Standard was drafted in accordance with the rules given in GB/T 1.1-2009. This Standard replaces GB/T 3326-1997 "Furniture - Main sizes of tables and chairs". Compared with GB/T 3326-1997, the main technical changes are as follows: - modified the codes of tables, chairs and stools (see Clause 2 of this Edition, Clause 2 of Edition 1997); - added the size requirements for table top height, seat height, difference between intermediate clearance height and chair stool seat top height in matching height difference (see

3.1 of this Edition); - modified the size requirements for armrest internal width, seat depth and back length of armchair (see

3.2.1 of this Edition,

3.2.1 of Edition 1997); - modified the size requirements for front width, seat depth and back length of back rest chair (see

3.2.2 of this Edition,

3.2.2 of Edition 1997); - modified the size requirements for front width, seat depth and back length of folding chair (see

3.2.3 of this Edition,

3.2.3 of Edition 1997); - modified the size requirements for side length (or diameter) of square stool or round stool (see

3.3.2 of this Edition,

3.3.2 of Edition 1997); - deleted the size requirements for the height of the cabinet feet of the double cabinet table (see

3.4.1 of Edition 1997); - deleted the size requirements for the height of the cabinet feet of the single cabinet table (see

3.4.2 of Edition 1997); - modified the required size on the dressing table mirror along with

ground height (see

3.4.4 of this Edition,

3.4.3 of Edition 1997); - deleted the requirements for size limit difference (see 3.1, 3.2, 3.4,

## 1 Scope

China's national standard for the principal dimensions of tables, chairs and stools. It specifies the codes and the main sizes, and it applies to the design and manufacture of these products. It replaces GB/T 3326-1997 and its scope has been widened from tables and chairs to include stools. The changes in this edition are the kind that come from measuring people again. Size requirements are added for table top height, seat height and the difference between the clearance height beneath a table and the seat top height of the chair or stool that goes with it - that last one being the dimension that decides whether a person can sit at a table comfortably, and the one most often got wrong when a table and a chair are designed by different people. The armrest internal width, seat depth and back length of armchairs are revised, as are the front width, seat depth and back length of back rest chairs and of folding chairs, and the side length or diameter of square and round stools. The cabinet foot heights of single and double pedestal desks are deleted, the height of a dressing table mirror above the floor is revised, and the size limit deviations that the 1997 edition specified are removed throughout. That last deletion is the structural change: the standard now gives the sizes furniture should be and leaves the manufacturing tolerance to the product standards, which is where it belongs. Issued on 13 December 2016 and in force since 1 July 2017.

This Standard specifies the main sizes of tables, chairs and stools. This Standard is applicable to the design and production of double cabinet table, single cabinet table, dressing table (dresser), single-layer table, armchair, back rest chair, folding chair, rectangular stool, square stool, round stool. Other tables, chairs and stools may refer to this Standard for implementation.

## 2 Codes

The codes and instructions of main sizes of tables, chairs and stools are shown in Table 1. Table 1 -- Codes and instructions of main sizes of tables, chairs and stools No. Code Code instruction 1 B Table top width 2 B

## 3 Intermediate clearance width B

4 Side cabinet drawer width B5 950~1500 500~750  $\geq 580$   $\geq 520$   $\geq 230$  NOTE. When there are special requirements or contract requirements, all sizes are clearly stated in the contract by the supplier and the purchaser, and are not subject to this limitation.
