Foreword

This Standard was drafted in accordance with the rules given in GB/T 1.1-2009. This Standard replaces GB/T 3327-1997 "Furniture - Main sizes of cabinets". Compared with GB/T 3327-1997, the main technical changes are as follows: - modified the codes of sizes (see Clause 2 of this Edition, Clause 2 of Edition 1997); - deleted the requirements for ground-off size (see

3.2 of Edition 1997); - deleted the requirements for drawer depth (see

3.2.3 of Edition 1997); - modified the drawer size diagram (see

3.2.3 of Edition 1997); - modified the size diagram and requirements for high profile of bedside table (see

3.2 of this Edition,

3.3 of Edition 1997); - modified the requirements for net height of the bookcase (see

3.3 of this Edition,

3.4 of Edition 1997); - deleted the requirements for size limit difference (see 3.4,

3.5 of Edition 1997); - deleted the requirements for small cabinet size (see

3.6 of Edition 1997). This Standard was proposed by China Light Industry Federation. This Standard shall be under the jurisdiction of National Technical Committee on Furniture of Standardization Administration of China (SAC/TC 480). The drafting organizations of this Standard. Guangdong Yihua Wood Industry Co., Ltd., Guangdong Federal Furniture Group Co., Ltd., Shanghai Quality Supervision and Inspection Technology Research Institute, Mingzhu Furniture Co., Ltd., Shanghai Taiyi Enterprise Co., Ltd., China Furniture Association, Langfang Huari Furniture Co., Ltd., Beijing Furniture Industry Association, Zhejiang Meisheng Cabinet Co., Ltd. Main drafters of this Standard. Xu Jun, Luo Jufen, Huang Qiongtao, Zhou Shanlin, Yang Lei, He Fajian, Wang Jianbing, Liu Chenguang, Gu Zhangpei, Chen Fengyi, Tu Chunsheng. This Standard was issued for the first time in 1982, revised for the first time in 1997. Furniture - Main sizes of storage units

1 Scope

China's national standard for the principal dimensions of storage furniture. It specifies the codes and the main sizes, and it applies to the design and production of wardrobes, bedside tables, bookcases and filing cabinets, with other storage units able to refer to it. It replaces GB/T 3327-1997, and the changes are almost all deletions: the requirements for ground-off size, for drawer depth, for small cabinet sizes and for size limit deviations are all removed, while the drawer size diagram, the bedside table diagram and requirements, and the net height of a bookcase shelf are revised. The pattern is the same as in the companion standards for tables, chairs and beds issued on the same day, and it reflects a deliberate narrowing of what a dimensional standard is for. The 1997 editions tried to specify furniture completely - the size, the tolerance on the size, and a range of secondary dimensions - and that made them constraints on what could be built rather than guidance on what should be. This edition keeps the dimensions that follow from the human body and from what is being stored, and lets everything else go. The bookcase shelf height is the clearest example of what survives: it is set by the height of books, and a shelf that will not take a standard hardback is a defect no styling can redeem. The wardrobe hanging height and the bedside table height relative to a bed are of the same kind - determined by what they hold and by the person using them, not by the designer. Issued on 13 December 2016 and in force since 1 July 2017.

This Standard specifies the codes, main sizes of storage units. This Standard is applicable to the design and production of wardrobes, bedside tables, bookcases, filing cabinets. Other storage units may refer to this Standard for implementation.

2 Codes

The codes and instructions of main sizes of storage units are shown in Table 1. Table 1 -- Codes and instructions of main sizes of storage units No. Code Code instruction 1 B Width of storage unit 2 B
