The release history of this document and the document it replaces is as follows:

---First published in.2016 as GB/T 33355-2016;

---This is the first revision. Safety guidelines for the use of health care products and equipment

1 Scope

GB/T 33355-2026 is the Chinese national standard covering the devices used in health services - moxibustion and cupping equipment, heat and light devices, massage tools - with their safe operating conditions, the cleaning and disinfection between clients, and the contraindications. It replaces GB/T 33355-2016. It was issued on 28 January 2026 and has been in force since 1 August 2026, replacing GB/T 33355-2016. The document is under the responsibility of the National Administration of Traditional Chinese Medicine. This page is published from the official record of the 2026 edition; the clause text of a standard this

recent is not yet in circulation, and the figures, limits and tables it contains are those of the document itself, delivered in full with the English translation.

This document specifies the responsibilities of service providers and personnel involved in the safe use of healthcare supplies and equipment, as well as their safety practices, management, evaluation, and improvement. The requirements describe the corresponding verification methods. This document applies to the use of health care service supplies and equipment (hereinafter referred to as "supplies and equipment") within health care service institutions (hereinafter referred to as "institutions"). Full usage and management.

2 Normative references

The contents of the following documents, through normative references within the text, constitute essential provisions of this document. Dated citations are not included. For references to documents, only the version corresponding to that date applies to this document; for undated references, the latest version (including all amendments) applies. This document.

GB/T 30443 General Requirements for Healthcare Services

3 Terms and Definitions

The terms and definitions defined in GB/T 30443, as well as the following terms and definitions, apply to this document.

3.1 Various products used for healthcare services.

Note. See Appendix A for examples. [Source: GB/T 30444-2026, 3.15]

4 Service Providers

4.1 The organization shall comply with the requirements of GB/T 30443.

4.2 A management system (hereinafter referred to as "management system") that meets the needs of safe use and management of supplies and equipment shall be established and implemented.

4.3 A designated person should be responsible for the safe use and management of supplies and equipment.

4.4 At least one training session on the safe use and management of supplies and equipment should be conducted annually for relevant personnel, and records should be kept. The timing of the training... as follows:

---When new employees join the company;

---When purchasing new supplies and equipment;

---When changes to the original supplies and equipment may affect safe use and management;

---Other training required.

4.5 Training as described in

4.4 should be conducted in accordance with the instructions for use of the supplies and equipment or with the assistance of the supplier or equipment manufacturer.

5 Personnel Responsibilities

5.1 Management Personnel Key management personnel should be the primary responsible persons for the safe use and management of the institution's supplies and equipment, and should be responsible for the formulation, revision, training, and implementation of management systems.
