Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

This document is Part 3 of GB/T 37364 "Technical Specifications for Survey of Terrestrial Wildlife and Their Habitats". GB/T 37364 has been The following parts were published.

- Part 1: Guidelines;
- Part 2: Survey zoning;
- Part 3: Mammals;
- Part 4: Birds.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the State Forestry and Grassland Administration.

This document is under the jurisdiction of the National Technical Committee for Standardization of Wildlife Conservation, Management and Commercial Utilization (SAC/TC369).

This document was drafted by: National Forestry and Grassland Administration Forestry and Grassland Survey and Planning Institute, Chinese Academy of Sciences Institute of Zoology, Chinese Academy of Sciences Kunming Institute of Zoology Institute of Geographic Sciences and Natural Resources Research, Chinese Academy of Sciences, Northeast Forestry University, Heilongjiang Wildlife Research Institute, Guangdong Academy of Sciences Institute of Animal Research.

The main drafters of this document are: Gao Erhu, Li Xinhai, Yu Shulin, Yuan Jun, Tang Xiaoping, Huang Hong, Jiang Xuelong, Gu Yali, Wan Xinru, Zhang Libiao, Lin Lin, Zhang Qi, Li Yueling, Jiang Guangshun, Zhong Licheng, Sun Hongyu, Li Renqiang, Lin Chen, Shi Tian, Wang Pan, Yue Rongsheng.

Introduction

GB/T 37364 aims to establish basic methods for surveying terrestrial wildlife and their habitats.

GB/T 37364 is intended to consist of 9 parts.

- Part 1: Guidelines. The purpose is to provide basic terminology and general requirements for surveys of terrestrial wildlife and their habitats.

- Part 2: Survey zoning. The purpose is to provide a zoning scheme for surveying terrestrial wildlife and their habitats and the names of each unit. Name, code and scope.
- Part 3: Mammals. The purpose is to provide basic methods for mammal investigation.
- Part 4: Birds. The purpose is to provide the basic methods for bird surveys.
- Part 5: Reptiles. The purpose is to provide basic methods for reptile surveys.
- Part 6: Amphibians. The purpose is to provide basic methods for amphibian surveys.
- Part 7: Insects. The purpose is to provide basic methods for insect surveys.
- Part 8: Invertebrates (other than insects). The purpose is to provide basic methods for investigating invertebrates (other than insects).
- Part 9: Survey on artificial breeding and utilization. The purpose is to provide basic methods for surveying artificial breeding and utilization of wild animals.

Technical regulations for survey of terrestrial wildlife and their habitats Part 3: Mammals

1 Scope

This document specifies the survey content, survey methods, data processing and statistical analysis methods for the survey of wild populations and habitats of terrestrial mammals.

Survey results, quality control and other technical requirements.

This document is applicable to surveys on the distribution, number and habitat of wild populations of terrestrial mammals.

2 Normative references

GB/T 37364.1

GB/T 38590

3 Terms and definitions

The terms and definitions defined in GB/T 37364.1 and the following apply to this document.

3.1 single-species (taxon) survey

A survey of a species (subspecies), or a survey of multiple species of the same taxonomic group using the same method. investigation.

3.2 multi-species (taxon) survey

A survey of multiple species or taxonomic groups of species.

3.3 Camera group cameratraparray

The equipment is laid out in the same time period according to the prescribed plan, with consistent main parameter settings, basically consistent horizontal distances, and basically consistent working time periods.

A camera network consisting of multiple consistent automated cameras.

4 Survey Content

It should comply with the requirements of GB/T 37364.1.

5.1 Preliminary investigation

Before the formal investigation, it is advisable to conduct a preliminary investigation of each investigation site, collect relevant information on physical geography and socio-economics, and gain a preliminary understanding of the investigation site.
