Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009.

This standard uses the translation method equivalent to ISO 13767.2012 "ship and marine technology ship mooring and towing equipment side wheel

Cable guide.

The documents of our country that have a consistent correspondence with the international documents referenced in this standard are as follows.

---GB/T 36664-2018 Ship and marine technology ship mooring and towing equipment cable pulley (ISO 13755.2012, IDT).

This standard has made the following editorial changes.

--- Added the informative Appendix NA to explain the mark.

This standard is proposed and managed by the National Ship Armor Standardization Technical Committee (SAC/TC129).

This standard was drafted. Jiangnan Shipbuilding (Group) Co., Ltd., China Shipbuilding Corporation, the 708th Research Institute.

1 Scope

This standard specifies the classification, dimensions and technical requirements of the side wheel guides.

This standard applies to the design, manufacture and acceptance of side wheel guides.

2 Normative references

The following documents are indispensable for the application of this document. For dated references, only dated versions apply to this article.

Pieces. For undated references, the latest edition (including all amendments) applies to this document.

ISO 13755 Ship and marine technology ship mooring and towing equipment guide rollers (Shipsandmarinetechnology-

Ship'smooringandtowingfittings-Steelrollers)

IMOCircularMSC/Circ.1175 Ship Towing and Mooring Equipment Guide (Guidanceonshipboardtowingand

Mooringequipment)

3 Terms and definitions

The following terms and definitions apply to this document.

3.1

Safe working load safeworkingload; SWL

The maximum load that a mooring line is allowed to withstand under normal operating conditions, in kilohertz (kN).

4.1 type

The side wheel guides are divided into the following two types according to the structure.

--- Double roller type;

--- Three roller type.

4.2 Nominal size

The nominal size D_n of the side wheel guide is expressed in terms of the smallest dimension of the outer diameter of the roller in millimeters. 150, respectively

200, 250, 300, 350, 400, 450, and 500.

5 size

The structure and dimensions of the side wheel guide are shown in Table 1, Table 2, Figure 1 and Figure 2.
