Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

This document is part 4 of GB/T 38003 Classification and Coding of General Military and Civilian Resources. GB/T 38003 has been published for the following part.

Part 1: Oil products for supplies;

Part 2: Equipment-type civil transport ships;

Part 3: Aviation materials for equipment;

Part 4: Equipment-type sanitary equipment;- Part 5: Personnel categories;- Part 6: Facility Class. - Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed and coordinated by the National Technical Committee for Standardization of Logistics Information Management (SAC/TC 267).

This document was drafted by: PLA General Hospital, PLA Joint Logistics Support Force Drug and Instrument Supervision and Inspection Center, China Article Coding Center, Information Center of the Logistics Support Department of the Central Military Commission, Hebei Provincial Standardization Research Institute, Xiamen Municipal Standardization Research Institute, Beijing Municipal Standardization Research Institute, Yantai Standard

Metrology Inspection and Testing Center, Chongqing Quality and Standardization Research Institute, Henan Provincial Standardization and Quality Research Institute Research Institute, Luyi County Traditional Chinese Medicine Hospital.

The main drafters of this document are: He Kunlun, Li Li, Chen Weiqing, Wang Haiwei, Zhang Nan, Li Chi, Liu Guoqing, Cao Desen, Li Xiaoliang, Xiao Yushi, Li Kaiyuan, Wang Xianwen, Han Shuwen, Ji Guang, Yang Jun, Liu Jinsong, Dai Mengxi, Zhang Haiping, Gao Likun, Jin Dicheng, Jia Jianhua, Mao Fengming, Wu Che, Wang Lili, Meng Ruopu, Wang Can, Dong Jing, Liu Min, Han Ying, Yang Shimin, Li Congfen, Chen Zhenyu, Kong Weijia, Yi Xiao, Liu Ying, Luo Xuejuan, Li Tong, Wu Xinxin, Yang Guoling, Wang Dongjian, and Yang Ruifang.

Introduction

GB/T 38003 "Classification and Coding of Military and Civilian General Resources" aims to standardize the classification principles and methods of military and civilian general resources, coding principles, Method and code structure, classification code table and reference name code table. GB/T 38003 is planned to consist of six parts.

Part 1: Oil products for materials. The purpose is to standardize the classification codes and base name codes of oil products.

Part 2: Equipment-type civil transport ships. The purpose is to standardize the classification codes and base name codes of civil transport ships. - Part 3: Equipment Aviation Materials. The purpose is to standardize the classification code and reference name code of aviation materials.

Part 4: Equipment-type sanitary equipment. The purpose is to standardize the classification code and reference name code of sanitary equipment.

Part 5: Personnel Classes. The purpose is to standardize the classification codes and base name codes of personnel classes. - Part 6: Facility Class. The purpose is to standardize the classification code and base name code of facility class. - Classification and coding of military and civilian common resources Part 4: Equipment-type sanitary equipment

1 Scope

This document establishes the classification code structure for military and civilian general-purpose sanitary equipment and provides classification codes and base name codes.

This document applies to information processing and information exchange of military and civilian general health equipment.

3 Terms and definitions

The following terms and definitions as defined in GB/T 10113-2003, GB/T 18391.1 and GB/T 37936-2019 apply to this standard. document.

3.1 Health services equipment

Included in the military and civilian general instruments and equipment for implementing health and epidemic prevention, treatment of injuries and diseases, and medical care and health care in field conditions A general term for equipment and devices, etc.

3.2 fiducial item name; approved item name

A name for a group of objects that have similar characteristics and can be described by the same definition or data model.

4 Classification code structure of military and civilian general resource sanitary equipment

The classification codes for medical equipment in military and civilian general resources should follow the coding principles established in GB/T 37936-2019.

The equipment and sanitary equipment in the military and civilian general resources adopt a 7-digit alphanumeric code, among which.

The first letter "T" represents sanitary equipment;

The last 6 digits are hierarchical codes, with each level represented by 2 Arabic numerals, representing major categories, medium categories, and minor categories.

The structure of the classification code for sanitary equipment is shown in Figure 1.
