What this standard covers

This standard specifies the method for determining the fabric sample with a double slit tongue tear strength of law. Tear strength of the fabric measured in the direction from the initial tear notch to a predetermined gap length double the force required. This section applies to woven fabrics, fabric can also be applied in other manufacturing technical methods, such as non-woven cloth. This section does not apply to knitted fabric, woven elastic fabric. This section provides the use of constant elongation (CRE) tester.

Document data

International classification (ICS): 59.080.30.

Chinese classification (CCS): W04.

Estimated length of the Chinese original: 12,183 words.

Adopted international standard: ISO 13937-4-2000, IDT.

Supersedes the earlier edition GB/T 3917.2-1997.
