5.5 Early recovery
5.6 Rehabilitation without prosthetics
5.7 Wearing physical rehabilitation
5.8 Continuing care

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules of Standardization Documents" drafted:

This document is equivalent to ISO 21065:2017 Terminology related to the treatment and rehabilitation of lower limb amputees with prosthetics and orthotics:

Please note that some content of this document may be patented: The issuing agency of this document assumes no responsibility for identifying patents:

Introduction

There is currently no internationally accepted term to describe the therapies used in the treatment and rehabilitation phases of lower extremity amputees:

As a result, different medical teams around the world use their own terminology as needed, making it difficult to compare the clinical practices used by different medical centers:

The situation of bed practice methods:
