This document is in accordance with the provisions of GB/T 1:1-2020 "Guidelines for Standardization Work Part 1: Structure and Drafting Rules for Standardization Documents" drafting: Please note that some contents of this document may refer to patents: The issuing agency of this document assumes no responsibility for identifying patents: This document is proposed by the Ministry of Civil Affairs of the People's Republic of China: This document is under the jurisdiction of the National Standardization Technical Committee for Rehabilitation and Special Equipment for the Disabled (SAC/TC148): This document was drafted by: National Rehabilitation Assistive Devices Research Center, Anhui Zhongbiao Intelligent Quality Standard Research Institute Co., Ltd., Wuhu Social Children Children's Welfare Institute, Tongling Huiren Rehabilitation Hospital, Beijing Children's Welfare Institute, China Rehabilitation Aids Association, Beijing Social Management Vocational College (Ministry Training Center of the Ministry of Political Affairs), Anqing Social Children Welfare Institute, and Chizhou Guichi District Welfare Institute: The main drafters of this document: Tao Jing, Ma Fengling, Pan Guoxin, Xia Xiulin, Liu Junling, Zhao Liwei, Wang Yaping, Hu Nanping, Geng Tianlin, Zhang Zhiliang, Zhang Ting, Wen Xiaolan, Zhang Pengcheng, Tong Wei, Zhang Cui, Jiang Yuanyuan, Ge Hui, Wang Zhiwen: Specifications for configuration of rehabilitation aids in child welfare institutions

1 Scope

GB/T 42771-2023 specifies the assistive products a Chinese child welfare institution must provide. The children in these institutions are overwhelmingly disabled - that is now the main route into them - and the equipment they need is individual: a wheelchair or a seating system fitted to one child is unusable by another, and a growing child outgrows it within a year or two. Institutions have historically been equipped by donation rather than by assessment. The standard sets the general provisions, the basic and recommended configuration of personal assistive devices, the configuration of assistive devices in the

shared areas with their catalogue, and the management, covering the organisation and the quality inspection of what is provided, with an informative annex listing the assistive devices for the public areas. It took effect on 1 December 2023.

This document establishes the general rules for the allocation of rehabilitation aids in child welfare institutions, and specifies the allocation of rehabilitation aids for personal use and public areas: Configured rehabilitation aids and management requirements: This document is applicable to the configuration of rehabilitation aids in child welfare institutions established by government departments: Other forms of child welfare agencies may participate in as used:

2 Normative references
