**Rubber and rubber products - Guidance on the application of
statistics to physical testing**

橡胶与橡胶制品 统计学在物理试验上的应用指南

(English Translation)

Issued on: March 15, 2024

Implemented on: October 1, 2024

**Issued by: State Administration for Market Regulation, China National
Standardization Administration**

Table of Contents

Preface	
Introduction	
1 Scope	
2 Normative references	
3 Terms and Definitions	
4 Symbols	
5 Limitations of the trial results	
5.1 Variability	
5.2 Accuracy, trueness and precision	
5.3 Correlation and significance	
6 Distribution of results and measures of central tendency	
6.1 Overview	
6.2 Method	
6.2.1 Types of distribution	
6.2.2 Measures of central tendency	
6.2.3 Discrete measures	
6.2.4 Transformation to Normal Distribution	
6.2.5 Tests for departures from normality	
6.3 Application in rubber testing	
6.3.1 Overview	
6.3.2 Tensile test	
6.3.3 Fatigue	
6.3.4 Transformation to Normal Distribution	
6.3.5 Other uses of the median	
7 Confidence limits and significant differences	
7.1 Overview	
7.2 Method	
7.2.1 Confidence Limits and Confidence Intervals	
7.2.2 Significant Differences	
7.3 Application in rubber testing	
7.3.1 Overview	
7.3.2 Confidence limits and indicator limits	

7.3.3 Comparison of results	
8 Sorting Method	29
8.1 Overview	
8.2 Method	
8.2.1 Friedman test	
8.2.2 External counting inspection	
8.3 Application in rubber testing	
9 Criteria for Rejecting Outliers	
9.1 Overview	
9.2 Method	
9.2.1 Overview	
9.2.2 Dixon's test	
9.2.3 Cochran's test	
9.3 Application in rubber testing	
9.3.1 Overview	
9.3.2 Dixon's test applied to a single result	
9.3.3 Cochran's variance test	
9.3.4 Dixon's test applied to a set of means	
10 Analysis of variance (ANOVA)	
10.1 Overview	
10.2 Method	
10.2.1 Overview	
10.2.2 Single Factor with the Same Number of Observations	
10.2.3 Single Factor with Variable Number of Observations	
10.2.4 Two-way (and multi-way) ANOVA	
10.3 Application in rubber testing	
11 Regression Analysis	42
11.1 Overview	
11.2 Method	
11.2.1 Overview	
11.2.2 Linear Least Squares Method	
11.2.3 Quadratic Least Squares	
11.2.4 Cubic Least Squares	
11.3 Application in rubber testing	
11.3.1 Overview	

- 11.3.2 Effect of temperature on compression set
- 11.3.3 Effect of aging on tensile strength
- 11.3.4 Temperature of the shrinkage test
- 12 Measurement uncertainty
 - 12.1 Overview
 - 12.2 Method
 - 12.2.1 Overview
 - 12.2.2 Establishment of measurement model
 - 12.2.3 Evaluation of standard uncertainty
 - 12.2.4 Combined standard uncertainty
 - 12.2.5 Determination of expanded uncertainty
 - 12.2.6 Reporting of measurement uncertainty
 - 12.3 Application in Rubber Testing
- 13 Sampling
 - 13.1 Overview
 - 13.2 Method
 - 13.2.1 Overview
 - 13.2.2 Acceptance Quality Limit (AQL) and Limiting Quality (LQ)
 - 13.2.3 Determination of non-conformity
 - 13.2.4 Inspection level
 - 13.2.5 Attribute sampling plans
 - 13.2.6 Random Sampling
 - 13.3 Application in Rubber Testing
- 14 Number of samples.
 - 14.1 Principle
 - 14.2 Method
 - 14.3 Application in Rubber Testing
 - 14.3.1 Overview
 - 14.3.2 Optimization of confidence level
 - 14.3.3 Optimization of pass/fail status
- 15 The result shows
 - 15.1 Overview
 - 15.2 Method
 - 15.2.1 Test report
 - 15.2.2 Numerical rounding to

15.3 Application in Rubber Testing

15.3.1 Overview

15.3.2 Constructing a Histogram

15.3.3 Rounding Example

16 Precision Statement

16.1 Overview

16.2 Method

16.3 Application in Rubber Testing

17 Experimental Design

17.1 Overview

17.1.1 General Information

17.1.2 Principle

17.2 Methods

17.2.1 Overview

17.2.2 Descriptive Experiments

17.2.3 Comparative Experiments

17.2.4 Response Experiment

17.3 Application in Rubber Testing

17.3.1 Descriptive Experiments

17.3.2 Comparative Experiment

17.3.3 Response Experiment

18 Statistical Quality Control

18.1 Overview

18.2 Method

18.2.1 Overview

18.2.2 Count Control Chart

18.2.3 Measurement control chart

18.3 Application in Rubber Testing

18.3.1 Overview

18.3.2 Control chart

18.3.3 Cumulative graph

Appendix A (Informative) Comparison of this document with ISO 19003:2006 structure numbers

Appendix B (Informative) Technical differences between this document and ISO 19003:2006 and their causes

Annex C (informative) Editorial changes to ISO 19003:2006
