3 Terms, definitions and abbreviations	
3.1 Terms and Definitions	
3.2 Abbreviations	
4 Operation mode and function description	
5 Measurement conditions	
5.1 General	
5.2 Power Supply	
5.3 Environmental conditions	
5.4 Acoustic Environment	
5.5 Settings Adjustment	
5.6 Power Measurement Tools	
5.7 Signal Generation	
5.8 Specified values and precision	
5.9 Termination Load	
5.10 Output Level	
5.11 Volume Adjustment	
5.12 Sound level meter	
5.13 Additional functions	
5.14 Operation Mode	
6 Measurement steps	
6.1 Measurement sequence	
6.2 Settings	
6.3 Power consumption measurement	
Appendix A (Informative) Sound pressure measurement position	
A:1 Overview	
A:2 Measurement location example	
Reference	

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting:

This document is part 6 of GB/T 44021 "Measurement of power consumption of audio, video and related equipment": GB/T 44021 has been published in Lower part:

- Part 1: General;
- Part 2: Test signals and media;
- Part 3: Television sets;
- Part 4: Video recording equipment;
- Part 5: Set-top box (STB);
- Part 6: Audio equipment:

This document is equivalent to IEC 62087-6:2015 "Measurement of power consumption of audio, video and related equipment - Part 6: Audio equipment":

Introduction

As important consumer products, audio and video products are widely used in consumers' homes: The power consumption of audio and video and related equipment has become a major concern for consumers:

The development of this document provides a practical evaluation method for the power consumption evaluation of audio, video and related equipment, which will help strengthen the consumer product field:

It has played a positive role in building the domain standard system and promoting the healthy development of the industry:

GB/T 44021 "Measurement of power consumption of audio, video and related equipment" is planned to consist of 6 parts:

- Part 1: General: The purpose is to specify general requirements for power consumption measurements of audio, video and related equipment:
- Part 2: Test signals and media: The purpose is to give the test signals for audio, video and related equipment such as televisions and computer monitors:

Signals and media used when measuring power consumption:

- Part 3: Television sets: The purpose is to specify the power consumption measurement and related characteristics of television sets:

--- Part 4: Video recording equipment: The purpose is to describe the power consumption measurement method of video recording equipment with removable media and give the power consumption Measurement related various operation modes:

--- Part 5: Set-top Box (STB): The purpose is to describe the power consumption measurement method of the set-top box and give various Operation mode:

--- Part 6: Audio equipment: The purpose is to describe the power consumption measurement method of audio equipment:

Power consumption measurement of audio, video and related equipment Part 6: Audio equipment

1 Scope

This document describes a method for measuring power consumption in audio devices:

This document defines in detail the operating modes and functions applicable to audio devices:

This document applies only to audio devices that can be connected to a power source and does not cover audio devices that contain a non-removable main battery:

To include any number of auxiliary batteries:

The measurement conditions in this document represent normal usage of the device and may differ from usage under specific conditions, such as those specified in safety standards:

The usage is different under certain conditions:

2 Normative references

The contents of the following documents constitute the essential clauses of this document through normative references in this document:

For referenced documents without a date, only the version corresponding to that date applies to this document; for referenced documents without a date, the latest version (including all amendments) applies to this document:

GB/T 12060.5-2011 Sound system equipment Part 5: Test methods for the main properties of loudspeakers (IEC 60268-5:2007, IDT) GB/T 35758-2017 Measurement method for standby power of household appliances (IEC 62301:2011, IDT) GB/T 44021.1-2024 Measurement of power consumption of audio, video and related equipment Part 1: General (IEC 62087-1:2015, IDT) GB/T 44021.2-2024 Audio, video and related equipment power consumption measurement Part 2: Test signals and media (IEC 62087-2:

2023,MOD)

Note: There is no technical difference between the referenced content of GB/T 44021.2-2024 and the referenced content of IEC 62087-2:2015:

3 Terms, definitions and abbreviations

3.1

Terms and Definitions the terms and definitions defined in GB/T 44021.1-2024 and GB/T 44021.2-2024 and the following apply to this document:

3.1.1

Additional functions Functions not required for basic operation of the device:

3.1.2

audio equipment

Equipment whose primary function is to reproduce analog and/or digital audio signals:

3.1.3

Audio systems an audio device consisting of detachable or inseparable parts to perform one or more audio functions:
