3 Terms and definitions

The terms and definitions defined in GB/T 28202, GB/T 3324, GB/T 3325, GB/T 32487 and the following apply to this document.

3.1 Quality

The degree to which a set of inherent characteristics of a piece of furniture meets requirements.

[Source. GB/T 44164-2024, 3.2, modified]

3.2 Quality grading

The process of grading product quality through scientific evaluation and making product quality information clear.

[Source. GB/T 44164-2024, 3.3]

4.1 Applicability

Select major categories of furniture products (such as wooden furniture, metal furniture, etc.) according to the provisions of GB/T 4754, and Quality grades are divided on the

premise of complying with the provisions of national mandatory standards.

Furniture products can be graded by product index or comprehensive quality according to product characteristics. The quality grading index requirement is set as three. The grades are AAAAA, AAAA and AAA respectively. AAAAA is the highest grade, reflecting the highest level of current quality indicators. AAA
