Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting is required.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the State Forestry and Grassland Administration.

This document is under the jurisdiction of the National Forest Resources Standardization Technical Committee (SAC/TC 370).

This document was drafted by: Northwest Survey and Planning Institute of the State Forestry and Grassland Administration, Forest and Grassland Survey and Planning Institute of the State Forestry and Grassland Administration, Southwest Survey and Planning

Institute of Agriculture and Grassland Bureau.

The main drafters of this document are: Hu Yunyun, Hou Xiaowei, Rao Riguang, Liu Zhaomei, Hao Jiatian, Huang Guosheng, Pu Ying, Zhang Chengcheng, Liu Huan, Min Zhiqiang, Wang Zeng, Zhang Yong, Wen Miaoxia, Li Jiang, Wang Hanyu, Du Yichen, Zhang Jing, Li Guoxing, Cheng Wei, He Xuegao, Tian Cuicui.

Technical Specifications for Demarcation of National Public Welfare Forests

1 Scope

This document establishes the zoning principles for national public welfare forests, defines the zoning objects and scope, and stipulates the zoning process, definition and adjustment. and requirements in terms of results.

This document applies to the zoning, definition, adjustment and renewal of national public welfare forests.

2 Normative references

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 forest land

Land used for forestry development as planned by the people's government at or above the county level.

Note. This includes tree forests with a canopy density of 0.2 or above, bamboo forests, shrub forests, sparse forests, felled land, burned land, unforested afforestation land, nurseries And so on.

3.2 Non-commercial forest

Forest land and forests on forest land that are ecologically important or ecologically fragile and whose main purpose is to achieve ecological benefits.

3.3 state-level non-commercial forest

The ecological location is extremely important or the ecology is extremely fragile, which has a great impact on the ecological security of the country, the protection of biodiversity and the sustainable development of the economy and society.

An important role is played in forest land and forests on forest land whose main management purpose is to give full play to the forest's ecological and social service functions.

3.4 state-level non-commercial forest zonation

The process of demarcating national public welfare forests and implementing them on mountain tops and plots of land in accordance with the needs of national ecological protection and technical specifications.
