Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

This document is modified to adopt ISO 22300:2021 "Security and resilience terminology".

This document has the following structural adjustments compared to ISO 22300:2021.

--- Deleted 3.1.31, 3.1.32, and 3.1.72, and the subsequent item numbers were moved forward accordingly.

The technical differences between this document and ISO 22300:2021 and their reasons are as follows.

--- Changed the definition of the term "emergency" (see 3.1.84, 3.1.87 of ISO 22300:2021) to comply with current laws in my country Regulations;

--- Deleted "civil society" (see 3.1.31 of ISO 22300:2021), "civil society organizations" (see 3.1.32) and the terminology and definition of "decentralized rights" (see 3.1.72 of ISO 22300:2021) to suit my country's national conditions.

The following editorial changes were made to this document.

--- Changed the notes in some definitions of terms such as 3.1.14, 3.1.71, 3.1.131, etc.

1 Scope

This document defines the terminology for security and resilience standards, including terms such as security and resilience, anti-counterfeiting invoices, supply chain and CCTV.

This document is applicable to the formulation and revision of standards related to safety and resilience.

2 Normative references

This document has no normative references.

3.1 Security and resilience related terms

3.1.1

Access

ability of a rights holder (3.1.211) to use a service or product or to derive benefits (3.1.17) from it

NOTE: Limitations may be caused by distance from the source (e.g. a water network cannot reach a certain community) or by unaffordability (e.g. the cost of the service is too high for a certain household or population).

The cost is too high) and other reasons.

3.1.2

activity

A set of one or more tasks with a defined output.

3.1.3

Adhesive; glue

A mixture that bonds two materials together.

Note: To produce an effect through heat, pressure or chemical reaction.

3.1.4

affected area

The spatial scope affected by a disturbance event (3.1.73) (accident, disaster).

NOTE This term is often associated with immediate evacuation (3.1.89).

3.1.5

after-action report

final exercise report Record, describe and analyse actual disturbances (3.1.72) or drills (3.1.94), draw on the debriefings and reports of observers (3.1.160), and summarize Documentation of lessons learned (3.1.74).

NOTE: The after-action report records the results of the after-action review (3.1.208).

3.1.6

Alert

to draw the attention of first responders and persons at risk (3.1.173) as an emergency (3.1.84) develops Note. Alerts are part of public warnings (3.1.194).
