3.7 Glass breaking machine glassseveringdevice

4 Glass grinding and polishing machinery

4.1 glass grinding machine glassgrindingmachine

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed by China Building Materials Federation.

This document is under the jurisdiction of the National Technical Committee for Standardization of Building Materials and Equipment (SAC/TC465).

This document was drafted by: Foshan Shunde District Quality and Technical Supervision Standards and Coding Institute, Bengbu Kaisheng Engineering Technology Co., Ltd., Guangdong Province Machinery Research Institute Co., Ltd., Shenzhen Jixiangyun Technology Co., Ltd., Luoyang Institute of Technology, China Building Materials Machinery Industry Association, Changsha Baitong New Materials Technology Co., Ltd., Guangdong Lifeng Intelligent Technology Co., Ltd., Bengbu Chaoyang Glass Machinery Co., Ltd., Foshan Chancheng District Quality Technology Association, Tianjin Sinoma Engineering Research Center Co., Ltd.

The main drafters of this document are: Li Junsheng, Xu Dichun, Ye Kun, Wang Yumin, Li Yingqi, Liu Jie, Hao Xiangguo, Huang Zaifu, Li Bin, Xia Penghua, Chen Haibing, Guo Guichao, Wang Song, Yang Chuxin, Zhao Jing, Xu Wenhua, Zhao Hongxun, Zhang Jiazhu, Zhang Keli, Fu Weixia, Guo Tianyu, and Cai Zhongjie.

Flat glass processing machinery terminology

1 Scope

This document defines the terminology used for machinery for the further processing of flat glass.

This document applies to the interpretation of terms related to flat glass deep processing machinery.

2 Normative references

This document has no normative references.

3.1 glass cutting machine

Equipment that uses cutting tools, lasers, high-pressure water, flames and other processing methods to cut flat glass.

3.2

A glass cutting machine (3.1) that uses cutting tools such as a cutter wheel and a wire saw to cut flat glass.

3.3

Glass cutting machine (3.1) using laser energy for cutting.

3.4

A glass cutting machine (3.1) uses a mixture of high-pressure water and abrasives to shoot at the surface of flat glass at high speed to cut the glass.

3.5

A glass cutting machine (3.1) that uses a heat source to heat and cut glass.

3.6

Glass cutting machine (3.1) that meets the requirements for cutting ultra-thin glass products.

3.7 Glass breaking machine glassseveringdevice

A device that separates flat glass from the cut.

4.1 glass grinding machine glassgrindingmachine

A device that uses grinding to remove excess material from flat glass blanks to achieve plane accuracy, dimensional accuracy or surface roughness.
