**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 44929-2024

**Specifications for the scientific proposal evaluation of space
high-energy astronomy**

空间高能天文科学观测提案评估规范

Issued on: December 31, 2024

Implemented on: April 1, 2025

**Issued by: State Administration for Market Regulation;
Standardization Administration of the PRC**

Table of Contents

Preface	III
1 Scope	1
2 Normative references	1
3 Terms and Definitions	1
4 Science Observation Proposal Classification	2
5 Organizational Planning and Solicitation Evaluation Process	2
5.1 Organization and Planning	2
5.2 Annual Observation Proposal Collection and Evaluation Process	2
5.3 Opportunity Observation Proposal Collection and Evaluation Process	3
5.4 Chief Chartered Observation Time Proposal Collection and Evaluation Process	3
6 Observation Opportunity Announcement	3
6.1 Announcement	3
6.2 Announcement Content	3
7 Call for Proposals for Scientific Observations	3
7.1 Organization and Implementation	3
7.2 Call for Proposals	3
8 Science Observation Proposal Evaluation	4
8.1 Organization and Implementation	4
8.2 Technical Assessment	4
8.3 Scientific Assessment	4
8.4 Proposal Rating	4
9 Evaluation results released	5
Appendix A (Informative) Sample Science Observation Proposal Evaluation	6

Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document was proposed by the Chinese Academy of Sciences.

This document is under the jurisdiction of the National Technical Committee for Space Science and Its Applications Standardization (SAC/TC312).

This document was drafted by: Institute of High Energy Physics, Chinese Academy of Sciences, National Astronomical Observatories, Chinese Academy of Sciences, National Space Science Center, Purple Mountain Observatory, Chinese Academy of Sciences, and Space Application Engineering and Technology Center, Chinese Academy of Sciences.

The main drafters of this document are: Zheng Shijie, Song Liming, Jia Shumei, Li Xiaobo, Xu He, Xin Liping, Jin Chichuan, Han Xuhui, Tong Jizhou, Su Yang, Wang Hongfei.

Specification for the evaluation of proposals for space high-energy astronomical science observations

1 Scope

This document specifies the evaluation activities for space high-energy astronomical scientific observation proposals, including the classification of scientific observation proposals, evaluation process, and evaluation work.

Projects and requirements, etc.

This document is applicable to the evaluation activities of proposals for space high-energy astronomical science observations, and the evaluation activities of other space astronomical observation proposals shall be implemented as a reference.

Note. In this document, space high-energy astronomy refers to observational research on X-rays, gamma rays and high-energy particles carried out in space.

2 Normative references

GB/T 30114.1

GB/T 30114.3

3 Terms and definitions

The terms and definitions defined in GB/T 30114.1, GB/T 30114.3 and the following apply to this document.

3.1

The proposal solicitation instructions officially released to the public.

Note. The announcement of the observation opportunity includes specific information such as the time and content of the proposal collection.

3.2 Cycle Proposal

Observation applications for this round of observations are collected publicly during a specific period of time.

Note. Each round of observation usually lasts for one year or half a year.

3.3

An observation application submitted temporarily for sudden astronomical phenomena or other scientific and calibration needs.

3.4

Observation requests using dedicated observing time from the project's chief scientist.

3.5 Core Proposal coreproposal

Observation applications are submitted by the core team of the project to achieve the core scientific objectives of the project.

3.6 Guest Proposal

Observation requests submitted by general scientific users to achieve specific scientific goals.
