3 Terms and definitions

The following terms and definitions apply to this document.

3.1 National Park

It is established and managed by the state with the main purpose of protecting nationally representative natural ecosystems and realizing the natural resource Specific areas for scientific protection and rational use.

3.2 National Park Control Zone

Within the national park, different levels of control are implemented based on the characteristics of natural ecosystems, functional positioning and management objectives, and on the basis of use or control intensity.

A spatial unit of differentiated control.

Note. It is divided into core protection area and general control area.

4.1 Protection first, green construction

On the premise of ensuring the health, stability and virtuous cycle of the natural ecosystem of the national park, we will use the green construction concept to build a green and living
