Foreword

This document is in accordance with the provisions of GB/T 1.1-2020 "Guidelines for

standardization work Part 1: Structure and drafting rules for standardization documents" Drafting.

Please note that some of the contents of this document may involve patents. The issuing organization of this document does not assume the responsibility for identifying patents.

This document is proposed and coordinated by the China Federation of Supply and Marketing Cooperatives.

This document was drafted by: China Renewable Resources Recycling Association, Zhejiang Lianyun Zhihui Technology Co., Ltd., Feibao (Suqian) Digital Technology Co., Ltd., GEM Co., Ltd., Xiamen Luhai Environmental Protection Co., Ltd., Ouye Chain Gold Recycling Resources Co., Ltd., Hubei Recycling Resources Group Co., Ltd., Tianjin Renewable Resources Research Institute of China National Supply and Marketing Cooperatives, Zhongbiao Hexin (Beijing) Certification Co., Ltd., Tianjin Yingtai Recycling Technology Co., Ltd., Southeast University, and Ikstar (Qingdao) Holding Co., Ltd.

The main drafters of this document are: Tang Yanju, Pan Yonggang, Xing Hongwei, Xu Tiecheng, Wang Yong, Wang Haitao, Xu Kaihua, Jiang Fengfeng, Tao Wei, Wang Jianqiang, Xie Yibin, Hu Jiawei, Zhang Lili, Cao Yang, Zhao Bin, Wu Xiaoyan, Sun Xiaofeng, Zhang Qi, Liu Xiaoming, Su Yu, Chen Xiaoyan.

Construction and management specifications for recycling resource sorting centers

1 Scope

This document establishes the general principles for the construction and management of renewable resource sorting centers, provides the classification of renewable resource sorting centers, and stipulates The capacity requirements, construction requirements and management requirements of the recycling resource sorting center are described, and the corresponding verification methods are described.

This document applies to scrap steel, scrap nonferrous metals, waste paper, waste plastics, waste rubber, waste glass, waste textiles, waste large furniture, waste The construction and management of recycling resource sorting centers for electrical and electronic products shall be implemented accordingly for other categories.

This document does not apply to the dismantling of waste electrical and electronic products and scrapped motor vehicles and ships.

3 Terms and definitions

The following terms and definitions apply to this document.

3.1 Recyclable resources

Produced in the process of social production and consumption, it has lost all or part of its original use value and can be recycled, processed and treated.

Regaining the value and use value of various wastes.

3.2 Sorting center sorting center

The recycled resources collected by the recycling system are sorted, disassembled, sheared, crushed, cleaned, packaged, stored and processed in a professional and large-scale manner.
